

Hambleden Herbs Rooibos & Liquorice Tea Bags Tasting Notes

Ingredients

Organic Rooibos, Organic Liquorice Root.

Preparation

Ideally use freshly drawn water that is just off the boil. Infuse for 2-3 minutes or until desired strength is reached.

Visual Notes

Bright caramel in colour.

Aroma Characteristics

Woody, earthy and nutty, are all used to describe the aromas of Rooibos, add to that list tobacco and vanilla notes and you have a clear description of rich, organic Rooibos. As the infusion steeps, the liquorice will start to come through but it will always be a secondary aroma to the hearty Rooibos.

Taste Characteristics

This is where the liquorice flavour is much more apparent. It adds a natural sweetness that compliments the vanilla notes and lifts the dry mouthfeel of the Rooibos. The liquorice also gives the tea a greater length, leaving you with a rich liquorice flavour.

A naturally caffeine free drink our Rooibos & Liquorice can be enjoyed at any time of the day.

I sincerely hope that this brief guide will help you to enjoy our infusion, but should you have any further questions or feedback, please let me know.
